

PERMANENT EAVES LIGHTING

Permanent Lighting Planning Checklist

Plan the look you want before comparing prices. Use the checklist to define the rooflines, finish and aftercare that matter to you.

01 Choose the areas you want lit

- ☐ Mark the front, garage, peaks, visible sides or patio on a photo or simple sketch.
- ☐ Show where lighting should stop; note corners, roof heights and access concerns.

02 Decide on the everyday look

- ☐ Choose warm white, holiday colours or both; ask to see the available white settings.
- ☐ Confirm the track colour and placement, and review daylight and night-time examples.

03 Try the controls

- ☐ Ask for a demonstration of brightness, colours and scheduling features.
- ☐ Check any app/account needs, connectivity requirements and controller location.

04 Check the proposed system

- ☐ Request specifications for the lights, power supply and controller, including outdoor and temperature ratings.
- ☐ Ask about relevant Canadian certification and any owner, condo or electrical approvals.

05 Put installation and aftercare in writing

- ☐ Confirm the marked layout, track finish, power connection, installation and tax.
- ☐ Ask what the warranty covers for parts and labour, who provides service and any visit charges.

Bring a marked photo

A clear route makes quotes easier to compare. At Green Origin, the track is colour-matched aluminium with five LEDs per metre. Ask for the exact layout and written warranty terms for your project.

PERMANENT EAVES LIGHTING

Compare your lighting options

Use one agreed layout for both quotes, or write down exactly how the coverage differs.

Areas / rooflines to include _____

Track colour / everyday light setting _____

Compare the scope	Installer 1	Installer 2
Marked route + included rooflines		
Track colour + placement		
Lights, controller + power supply		
Controls / app / scheduling		
Outdoor + temperature specifications		
Power connection + installation scope		
Warranty: parts / labour / service charges		
Total, tax + payment terms		
Exclusions + access requirements		

My must-haves / questions before booking
